Tokyo, March 24, 2011

Dear Dr. Hollo,

Thank you for your heartfelt message dated on March 17.

Although the situations of the Fukushima and the earthquake-influenced area have not settled yet, we are trying our best to mitigate the environmental release of radioactive gas and particles. We have also started to reinforce the countermeasures against the similar disasters for the other domestic nuclear facilities kept intact.

I regret I have little time to share our information to you at the moment, but I am convinced that our experience will contribute to the global sound utilization and understanding of nuclear energy in future.

I appreciate again your kind concern to us.

Sincerely yours,

Yonezo Tsujikura
President
